"Draper Expert HI-TORQ"
6 point

• This product is designed for use within the ever-increasing hybrid and electric vehicle sector.

• Draper Expert Quality and manufactured from chrome vanadium steel to DIN Standard and individually certified to EN 60900, each component has been tested to 1000V AC and 1500V DC for safe live working. Due to the risks inherent with the high amperage batteries in hybrid/ electric vehicles, these tools are fully insulated preventing accidental contact to exposed metal.

IHT-30 LIQUID COOLED INDUCTION HEATER (3.5kW)

Designed for industrial workshops where controlled, safe and efficient heating of ferrous and some non-ferrous metals is required. Attached with a precise focusing tip for accurate work and fully adjustable, computer controlled, three heating modes. An ability to link, via the universal remote control software with external digital or analogue systems enable the user to utilise the control software to the maximum, whilst the quiet cooling internal fan assisted radiators allow continuous use. These features enable the user to replace dangerous and difficult to control oxy-acetylene gas heating with simple to use, but highly effective, electrical induction heating.

Stock No. 76171

IHT-15 INDUCTION HEATER KIT (1.75kW)

Easy to use induction heater, operated by simply installing the appropriate coil type and place over or around the ferrous metal you wish to heat. Each kit is supplied with a hardwearing carry case and four different shaped coils, delivering flexibility of use. Compared against braziers or welding/heating techniques, induction heaters are far safer and economic, as they don't use a naked flame and you save on gas bottle hire

SC100 HYDRAULIC SPRING COMPRESSOR

An industrial machine that's your total solution for ALL springs, including all Mercedes model springs, without the need for expensive adaptors.

Heavy duty construction with full size safety cage and robust wheels. Fully independent arms allow vertical and horizontal movement. Three sizes of jaws make this machine universal and suitable for all sizes of springs. The strut leg vice enables clamping of the leg instead of using the jaws, the ideal solution for all those awkward Mercedes struts.

Supplied with: 1 x fixing jaw 30-70mm, 1 x yoke 75-110mm, 1 x yoke 110-140mm, 1 x yoke 140-190mm.

Applications:

Linear springs - standard straight springs, constant stiffness.
Progressive springs - gain stiffness as they compress.
Side load springs (aka banana springs) - eases force on strut.
Mini block - compact and progressive.
This spring compressor covers ALL springs including the following:
Mercedes C Class W203 pre 07 and C Class W204 08-14
Mercedes E Class W207/C207 09-18
VW Touareg
Mercedes C Class W205 15-18
Mercedes ML 163 97-05

EX. VAT PRICE
£1349.00
INC. VAT PRICE
£1618.80

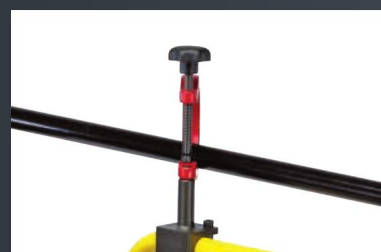

Stock No. 56191
List Price £2102.14 ex. vat

SPECIFICATION:

Coil spring capacity	... 2 tonnes
Dimensions	... 520 x 690 x 1320mm
Upper base travel	... 226mm
Lower base travel	... 240mm
Weight	... 115kg

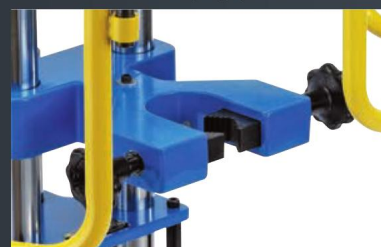

The products marked with this logo can only be delivered on a pallet. Prior to purchase, please ensure you have adequate facilities to unload palletized deliveries.

Safety device preventing users from operating the compressor when the safety cage is open

Adjustable upper fixing jaw provides stronger grip

Interchangeable vice and jaws for use on most popular struts

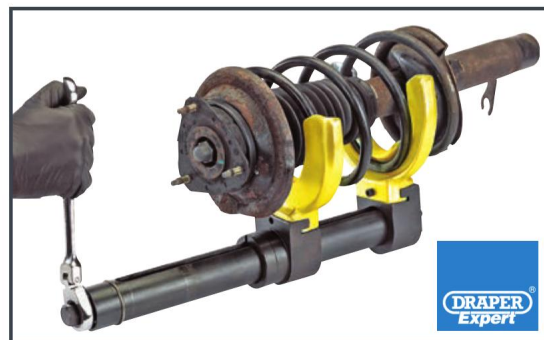

Lower adjustable base supports the bottom of the strut

N1000B COIL SPRING COMPRESSOR KIT

For use on AUDI, BMW, FORD, HONDA, MITSUBISHI, NISSAN, PORSCHE, SAAB, SUBARU, TOYOTA, VAUXHALL, VOLVO and VW

Stock No. 60981
List Price £250.00 ex. vat

EX. VAT PRICE
£218.20
INC. VAT PRICE
£261.84

This set will easily and safely compress Macpherson as well as conical springs and medium size motorcycle springs. Safety overload system ensures protection for user while yoke protectors stop the springs from being damaged.

Prices shown are typical selling prices and may vary in-store.

WA100 DIGITAL 3-D FOUR WHEEL ALIGNER

The four-wheel system gives increased accuracy to a multitude of suspension and steering requirements. Simple to operate, the wheel aligner guides technicians through the measuring process, ensuring cars operate with maximum efficiency, comfort and safety, combining unmatched accuracy with user-friendly qualities. The extensive vehicle database, automatically compares the latest technical specifications in line with vehicle manufacturers recommendations, providing free automatic system updates, free vehicle data updates and free technical assistance. Advanced readings and accurate diagnostic information in real-time are provided by hi-tech imaging technology, including high-resolution cameras and advanced wheel targets. The high-resolution cameras produce live alignment readings and diagnostic data, whilst the cloud-based technology provides unlimited free data updates and software maintenance. Each four-wheel aligner is connected to the cloud and fitted with a 24" LCD display, 500 mega pixel real-time infra-red camera, 4 x target plates with clamps and an on-board printer, enabling data sheets to be supplied to customers.

TC200 SEMI AUTOMATIC TYRE CHANGER WITH ASSIST ARM

Semi-automatic tyre changer, capable of removing and replacing tyres on wheels up to 26". Fitted with an assist arm (also known as a third arm) to aid the user when changing low profile and run flat tyres. The fully motorised turntable, pneumatically operated clamping jaws, powerful pneumatic bead breaker and tilt column enables the changing of low profile and run at tyres quickly and easily. The self-centering four-jaw chuck, controlled by two clamping cylinders, always ensures wheel rims are correctly clamped. Alloy rims are treated particularly gently as the mounting head is provided with plastic protectors. The bead breaker is attached with a large anti-skid rubber pad, which preserves the tyres and rims. The machine is operated from a standard 13amp 3 pin plug enabling self-installation. Supplied with the following accessories: tyre lever, filter regulator lubricator to connect your compressed air supply, alloy rim protectors, head tongue protectors and inflation gun and air hose

Stock No. 78612
List Price £2498.00 ex. vat

TC100 SEMI AUTOMATIC TYRE CHANGER

Capable of removing and replacing tyres on wheel up to 23". Fully motorised turntable, pneumatically operated clamping jaws and powerful pneumatic bead breaker. Self centring four jaw chuck controlled by two clamping cylinders. Alloy rims are treated especially gently as the mounting head is provided with plastic protectors. The bead breaker is provided with a large anti-skid rubber pad to preserve tyres and rims. Operated by a standard 13 amp 3 pin plug enabling self installation. The mounting arm swings to the side so the machine can be installed directly near a wall, perfect for those with limited working space. Supplied with the following accessories: tyre lever, filter unit, alloy rim protectors, head tongue protectors and inflation gun and air hose

TYRE CHANGER AND WHEEL BALANCER KIT

The tyre changer is capable of removing and replacing tyres on wheels up to 23". Powered by a fully motorised turntable and fitted with pneumatically operated clamping jaws and bead breaker enabling the changing of conventional tyres quickly and easily. The bead breaker is attached with a large anti-skid rubber pad, which preserves the tyres and rims. Each machine is attached with a self-centring four-jaw chuck guaranteeing that wheel rims are correctly clamped. Alloy rims are treated particularly gently as the mounting head is provided with plastic protectors.

Supplied with the following accessories: 4 x centering cones, centering shaft, wheel weight pliers, hub nut and rim width calipers, tyre lever, filter regulator lubricator to connect your compressed air supply, alloy rim protectors, head tongue protectors and inflation gun and air hose.

UCT27L 27L ULTRASONIC CLEANING TANK

Tank Size: 500 x 300 x 150mm
NB: Before use, check that item being cleaned is suitable for ultrasonic cleaning.

Stock No. 60987
List Price £759.98 ex. vat

Other sizes also available. Visit our website for details.

Ultrasonic cleaning is based on the cavitation effect caused by high frequency ultrasonic wave vibration in fluid.

Microscopic bubbles are formed and they implode violently causing the cavitation, creating an intense scrubbing action on the surface of the item being cleaned.
